

## Information about fluoride treatments

Recommended frequency for the topical fluoride application is every 6 months.

In some special cases we recommend it every 3 months.

However, some insurance plans only cover this benefit once a year. Please initial your choice below.

Yes, I would like for my child to receive fluoride treatments as recommended. I will be responsible for the balance for the second treatment.

No, please only provide it at the frequency that my plan allows.

Please note, a few insurance plans may not cover fluoride treatments at all. As a courtesy to our families, we will make every effort to obtain the information about the coverage before the visit, but it is not always possible. It is the responsibility of the covered person to be familiar with the particulars of his/her specific insurance policy.
